CATALOGUE

DESIGN EXPRESSION

[Explore Our Brochure](#)

Discover the perfect blend of eco-friendly design and luxury.

Browse our catalogue to find mineral surfaces that bring elegance and sustainability to your space.

Every surface begins with a flaw.

Instead of hiding the flaws in stone and ceramic, Vitium uses vacuum thermal technology to transform them. It redefines 'surface' by embedding design directly into the material's structure.

VITIUM

This process creates seamless continuity and organic depth. By integrating patterns into the core, veins follow edges naturally in a way previously impossible with traditional materials.

**This is not decoration.
This is control.**

SUPERBIA

A striking white base layered with bold grey movement and warm amber veining, Superbia captures the drama and elegance of natural marble with a contemporary edge.

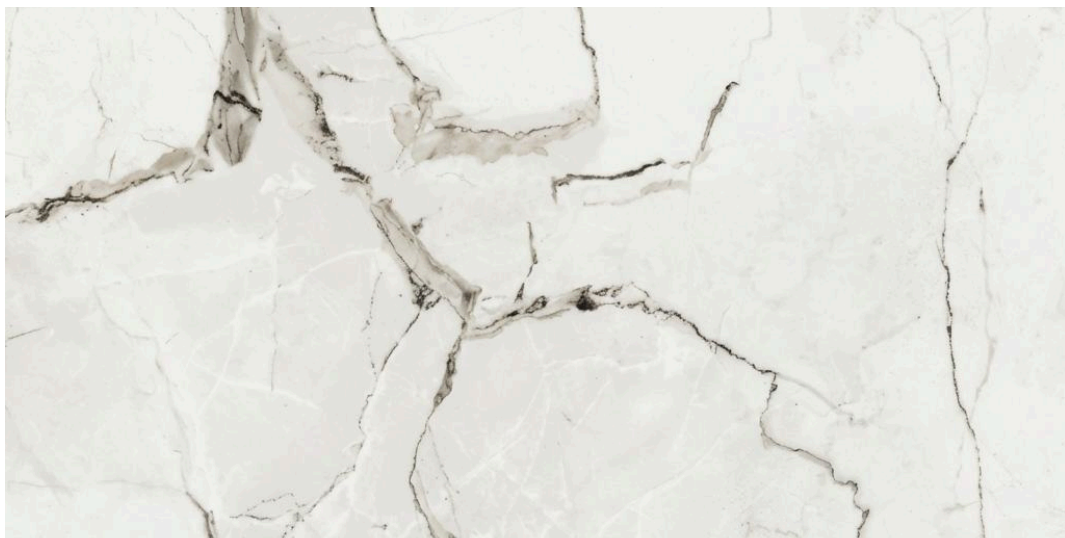

Perfect for kitchens, bathrooms, and interior applications.

SMART SURFACE ENGINEERING

SILVER
TRAVERTINE

A layered blend of soft silver and warm grey tones with subtle linear movement, Silver Travertine captures the understated texture and natural depth of classic travertine stone.

Perfect for kitchens, bathrooms, and interior applications.

BARCELONA GOLD

A dynamic interplay of warm gold, soft ivory, and deep charcoal accents, Barcelona Gold delivers a bold, contemporary interpretation of natural stone with striking visual contrast.

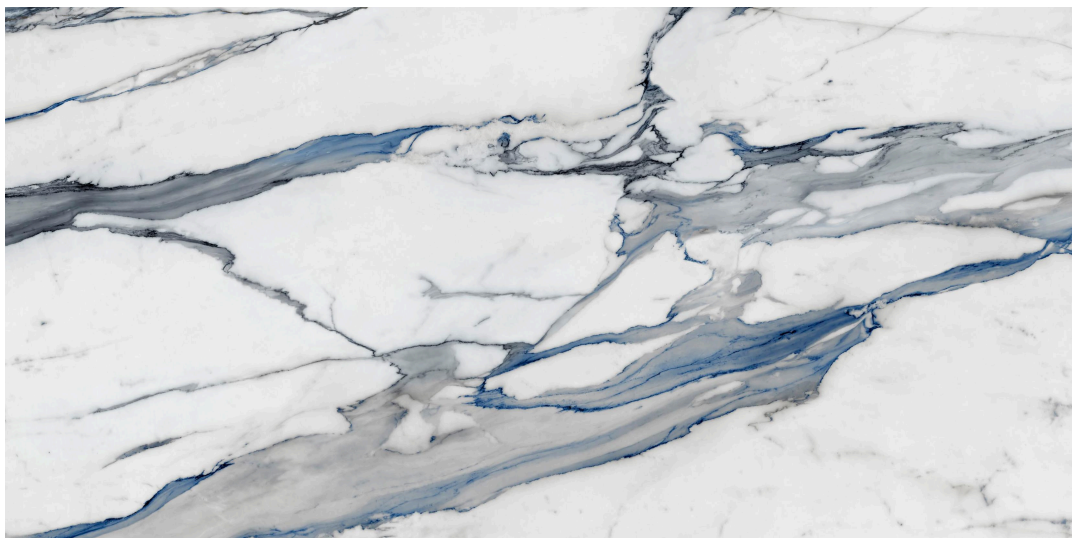

Perfect for kitchens, bathrooms, and interior applications.

BLUE BAHIA

A crisp white base cut through with fluid grey veining and striking blue accents, Blue Bahia delivers a bold, contemporary statement inspired by rare natural stone.

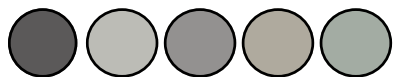

Perfect for kitchens, bathrooms, and interior applications.

Imagine • Design • Create

Not just material.
A refined surface,
brought to life.

Powered by patented Vitium Technology, white mineral surface slabs are transformed into refined, premium surfaces through an advanced vacuum printing process.

This technology creates deep, natural-looking textures with seamless continuity across the entire surface, including edges.

Design Without Limits

With Niche Surfaces and Vitium Technology, every project becomes a unique expression of design.

From concept to surface, creativity is no longer constrained by material, it is defined by it.

Create without compromise.
